*1 Hybrid inverter can be replaced as storage inverter(WIT 50-100K-A/-AU), PV input data will be removed.

*2 The maximum open circuit voltage of PV string should take into account the most extreme operating low temperature.

*3 The parameter of AC side data(Off-grid) is only available for WIT -HU/AU model.

*4 Floor installation requires extra base for battery(W/H/D=920/510/110mm).

*5 Labeled with "√" means the system can have a full load AC output, and labeled with "Limited" means the AC output of the system will be "0.5 multiplied by battery capacity when there is no sunlight".

* Nominal charge/discharge current and power derating will occur related to temperature and SOC.
